

Max Planck (Nobel Quantum scientist) stated: 'All matter originates and exists only by virtue of a force which brings the particles of an atom to vibration and holds this most minute solar system of the atom together...

We must assume behind this force the existence of a conscious and intelligent Mind which is **the matrix of all matter.**"

'Quantum physicists discovered that... if we really want to observe ourselves and find out what we are, **we are really beings of energy** and vibration, **radiating** our own unique energy signature ...' ²

As everything in creation is ultimately energy, all is interlinked and that is why our **sun-signs** influence our human character.

We see from the Stars and Black Holes that there are two forces at work the Positive and the Negative both in the Universe and our lives.

Positive Energy – Shining Stars

Love is the greatest God-given positive energy in the world. Love creates art, sculptures, paintings, music and babies - all fill us with such exhilarating glee.

Go for a walk, you'll enjoy it.
Ride a horse, it'll thrill you.
Hold a girl, it will change you.
Go for a swim, it will renew you.

It is all put there for us to enjoy, because God only wants the very best for us. In enjoying it we partake of his life-giving energy and we get renewed, reinvigorated and get that spring back in our step. All of nature is there to bring us his positive energy. Our insurmountable problems and disastrous obstacles will turn into challenges that we want to conquer and find answers for. His positive energy will help us tackle the difficulties.

"No problem can be solved from the same level of consciousness that created it." (Albert Einstein)
Once we tap into the positive energy, everything becomes possible!

Seeing that we are all made out of pure energy, it's important that we tap into the right energy source. The positive one, which will lift us above the mundane and will help us find positive solutions to any problem that we may encounter. Our face will have the shine of victory and our positive solutions and attitude will help to brighten someone's path, just like a shining star will give light in the night.

Negative energy - Black Holes

On the contrary, the negative energy can suck you into a black hole vortex of despair and hopelessness.

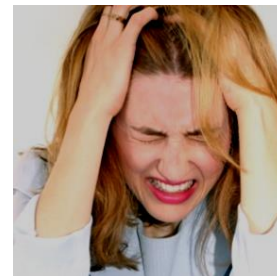

'When the energy of the star has died out, the star collapses under its own weight and it becomes a black hole.' ^{1B}

On the one side is Love, the positive energy of our star and if we partake of that energy we get renewed, inspired, and reinvigorated with positive explosions pushing and thinking outwards about others and how we can be of help to them.

On the other hand is the negative energy that will do everything within its power to increase the strength of our egotistic, dark, gravitational inward pull so we will acquire a negative mind-set where frustrations, fear, stress, discouragement, **mental health issues**, depression, and eventually suicidal tendencies will gain the upper-hand, because you've allowed the darkness to kill your light, your faith and your joie de vie.

We become a black hole to those around us, sucking in their energy with our negative and dark pull of gloomy self-absorption.

I quote: 'Black holes can also consume material torn from nearby stars. In fact massive black holes can swallow stars whole.' ²

This shows we need to be very careful concerning the company we keep, whether it is our employer or our friends, so we don't compromise what we know is right, to protect the light that we have.

This negative gravitational pull inside us strengthens itself when we absorb negative vibrations, whether it is bad company policies, horror movies, depressive music, violent gaming, or

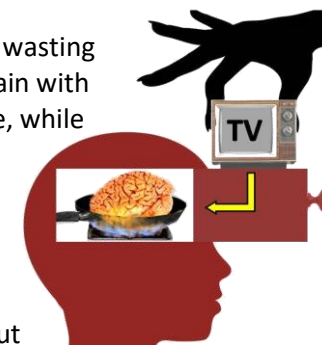

Satan worship, you name it. It is very difficult to get out of that addictive negative pull or 'scary thrill' unless you invoke God's help, who will assist those who genuinely come to him and earnestly seek his help.

We cannot blame our fears and negativity on our boss, or our circumstances, as we are personally responsible for our life, who we work for, what we do, watch or play and absorb.

Where the Buck Stops

I cannot blame the TV for wasting my time and frying my brain with a useless, bad programme, while I hold the remote control with the on-off switch in my hand. I can waste my time, or turn it off and do something positive. That is not the TV's decision, but that decision is one hundred per-cent mine. My personal on-off switch is my freedom of choice.

“REBELLION IS NOT WHAT MOST PEOPLE THINK IT IS, REBELLION IS WHEN YOU TURN OFF THE TV AND START EDUCATING YOURSELF AND THINKING FOR YOURSELF.” (Gavin Nascimento)

We, humans are the masterpiece of God’s creation, his Magnum Opus and ultimately all of creation still functions to see what decisions, positive or negative, each human masterpiece will make. As we’re beings of energy and vibration, radiating our decisions and unique energy signature into space, it stands to reason that the stars and black holes are likely the physical manifestation of our positive or negative decisions, being our unique energy signature.

“It is called black because no light can escape from it. Some black holes are the tombstones of what were once massive stars.” ^{3A}

“If quantum mechanics hasn’t profoundly shocked you, you haven’t understood it yet.” (Niels Bohr)

How to Tap into the Light

The Energy that constitutes all of creation in its purest form is Love and Light. “*Jesus said, I am the light of the world: he that follows me shall not walk in darkness, but shall have the light of life.*” (John 8:14) God’s character is clearly seen in Jesus. Jesus came to connect us back to the source of Love and light. None of us are strong enough to resist that constant negative dark pull on our heart. If the room is dark you don’t try to chase out the darkness, but you go to the light-switch and the darkness is gone. So it is in our spiritual life. If you seek the light-switch, it is right here: [Matthew](#), [Mark](#), [Luke](#) and [John](#). By reading the Gospels we start to understand God’s plan for our life as his words and life-story will transform the dark inward pull into energy and light. However, negative thoughts and voices will fight you tooth and nail to keep you from flipping the switch.

This is no religion, this is tapping into life to the max - the Energy that rules the universe. ‘Black holes are invisible, because they allow no light to escape. But space telescopes with special instruments can help find black holes.’⁴ Through reading and absorbing the Gospels you will get a special inbuilt instrument which will alarm you when you get too close to the vortex of a black hole.

All the mass of a black hole is concentrated into a point at its centre called the singularity. Gravity surrounding the singularity is so strong... from which nothing can escape. ^{3B}

He pulled me out of my black hole and believe me the darkness hates the light and will pull out all the stops to convince you otherwise. But if Jesus could do it for me then he can most certainly do it for you, no matter how deep you have fallen into that hole with no way out. He looks past everything that you have ever done and looks into your heart to see if you really want to be pulled out into the light and [do a break out.](#)

BLACK HOLES

‘Inside each star in the universe there is a battle royal going between the gravitational pull of the star pulling inwards on the one side, and explosions pushing outward. These nuclear explosions inside the star that are pushing outward are creating pressure to balance against the gravitational pull of drawing the star inwards, to make it a black hole.’^{1A}

The Lord compares us humans to the stars.

“*They that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as **the stars** forever.* (Dan.12:3,4) “*There is one glory of the sun, and another glory of the moon, and another glory of the stars: for **one star differs from another star in glory.***” (1Co:15:41)

“*And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and **let them be for signs, (our sun signs) and for seasons, and for days, and years.***” (Genesis 1:14)

Basics of Quantum Physics

Scientists began to recognize that everything in the Universe is made out of energy. All mass, including us humans, is ultimately energy.
