

# Our Majestic Universe

## Part 1 follow up on [‘The Missing Day’](#)

“And God said, Let the waters under the heaven be gathered together unto one place, and **let the dry land appear**: and it was so... And God said, Let the earth bring forth grass, the herb yielding seed, and the fruit tree yielding fruit after his kind, whose seed is in itself, upon the earth: and it was so.... And the evening and the morning were **the third day**.

And God said, Let there be lights in the firmament of the heaven... And God made two great lights; **the greater light to rule the day**, and the lesser light to rule the night: he made **the stars also**... And the evening and the morning were **the fourth day**.”  
(Genesis1:11-19)

### It somehow did Not make Sense to Me

While contemplating creation I was wondering why the Lord created the grass and vegetation before he created the universe?

In order to make the dry land appear he first had to launch this force that we call the ‘**Earth's gravity**’.  
(Newton called it gravity.

Einstein said gravity can also be repulsive. Nikola Tesla implied it was Electric Movement or an Electromagnetic Force, and others say something else. To relate, we'll name it 'Earth's gravity'.)

But why did the Lord do this before he uploaded the firmament of the heaven or the universe with the sun etc.? He should have placed the sun before he made the vegetation, as sunlight is vital for plant life. However this thought crossed my mind,  
“**Could it be that this 'Earth's gravity' was first put in place and afterwards the universe, as this gravitational force holds the universe together and the Earth is the actual centre of the universe?**”

I tried to put it aside as utter nonsense, but seeing it troubled me I did research and found this article:

'In 1929 **Edwin Hubble** announced that he had measured the speed of galaxies at different distances from us, and had discovered that the farther they were, the faster they were receding... **This might suggest that we are at the centre of the expanding universe.**' The article ends with: 'We still have no real answer to the question,

Edwin Powell Hubble  
1889-1953

Where is the centre of the universe?'<sup>1</sup>

Hubble discovered that the farther the galaxies were, the faster they were receding. This makes total sense if the 'Earth's gravity' is somehow holding the universe together. This gravitational pull of course loses its strength with distance. Thus the farther away the galaxies, the weaker the pull and so the faster they will recede or move away.

It was previously assumed that the Earth's 'gravitation' weakens or diminishes at the rate of about 5% per century, more recently it is implied to be about **5% every decade**.

### Then I Found this Jaw-Dropping Article

“As if the galaxies preferred to lie at some periodic spacing out from the Earth,” Prof. Hartnett explains.

‘Physics Professor John Hartnett, with Australia's University of Adelaide, studied the locations of some **400,000 GALAXIES** from the 2005 Sloan Digital Sky Survey and was astounded to see a surprising form and pattern in how they're arrayed, **ALL WITH EARTH AT THE CENTER.**'

“This is sort of like saying that our galaxy is somewhere near the centre of the universe, and when you look at the galaxies arrayed all around us, they're on sort of like gigantic shells.”<sup>2</sup> There is a movie made about it called ‘*the principle*’ but it seems to be blocked. All I found was [a CBN news broadcast](#) about it. (11/.2022)

Prof. John Hartnett

It is so shocking to the world of science, that even some scientists said afterwards, “I have no idea how I ended up in that stupid geocentrism documentary. The best thing we can all do when faced by nonsense promoted by fundamentalists who claim that science supports a literal interpretation of the Bible, is to ignore it in public forums, and not shine any light on the authors of this trash.”

Sorry, insults are cheap and low-class. All we need is by **further investigation** one factual proof (not theories and complicated words) that it's not true.

<sup>3</sup> **Science definition**: ‘Science is to discover **FACTS**... to formulate laws and principles based on these FACTS... that can be verified or tested by **further investigation**.’

### Is our Universe a 2-D Projection?

“In December, 2015, Japanese researchers attempted to tackle this problem by providing mathematical evidence that the holographic principle might be correct. The holographic principle suggests that, like the security chip on a credit card for example...,”

there is a two-dimensional surface that contains all the information needed to describe a three-dimensional object - which in this case is our universe. We are living in a giant hologram, and everything we see around us is a **projection of a 2D surface.**"<sup>4</sup> This could very well be true as it says,

**"He stretches out the heavens like a curtain"**

(Psalms104:2)

**"And the heaven departed as a scroll when it is rolled together."** (Revelation 6:14)

A curtain and scroll are two-dimensional, so it seems that the Japanese scientists are on to something.

### Do we Have an Inbuilt 3D Headset?

My son in law has a 3-D headset. I watched a diving documentary on his two dimensional flat screen of width and height. When I put on the 3-D headset suddenly it appeared like I was there underwater with the fish swimming around me. It all seemed very real. So my question is, "Are we watching a two dimensional universe through a three dimensional headset, which is built into the eye and our optical mechanism with its unmatched contrivances?"

**"The word 'Firmament'** is used to translate the Hebrew word *rāqīa'* (רָקִיעַ). It is derived from the root '*raqqa'* (רַקַּע), meaning 'to beat or spread out thinly',

Photo taken with slow-motion camera

e.g., the process of making a **dish** by hammering thin a lump of metal."<sup>5</sup>

Could this refer to the controversial 'Van Allen Belt'?

Here we see, **not a random universe flying past us at absurd speeds**, but how the stars rotate like a giant wheel or huge planetarium around Polaris, the North Star, in **perfect synchronization**,<sup>6</sup> straight above the North Pole.

**"He has fixed the earth firm, immovable"** (1Chr.16:30)

**"You fixed the earth on its foundation so that it never can be shaken."** (Psalm 104:5)

**"all the earth sits still, and is at rest."** (Zechariah 1:11)

This indicates that the Earth is stable and doesn't spin a **1000** miles per hour on its axle, nor speeds around the sun **67000** mph, while our solar system travels through space at **514,000** mph on its trajectory. No equipment can verify these numbers so we just accept them, as their size is beyond our comprehension and 'it all came about billions of years ago with a **Big Bang.**' Paul warns us about **"oppositions of false, so called science."** (1Tim.6:20)

### Where does this Leave Copernicus?

Up until Copernicus it was believed that the earth was the centre of the universe. Yet he hesitated to publish his heliocentric hypothesis as he had no scientific equipment to verify his ideas, but upon the persuasion of his student Rheticus he decided to publish his ideas, which was the start of **Modern Science.** His theory has become a "scientific fact". But can this "fact" be verified or **tested by further investigation** as per the science definition?

N. Copernicus 1473-1543

### Simple Geometry is Factual

If we follow the sunrays then we find the sun at the apex of the triangle; not at a bizarre guesstimate.

### Does the Moon reflect the Sun?

Another mind bender: unbelievable but true.

**"The moon shall not cause her light to shine"**.

(Isaiah 13:10, Matthew 24:29; Mark 13:24; Revelation 21:23)

This tells that **the moon gives her own light** and is not a sun reflector. Amazingly moonlight is not warm but **cold light**, and it's several degrees colder in direct moonlight than in its shade.<sup>7</sup>

(See the experiment) That's why the nights cool down more on clear nights, especially in the deserts where there is no cloud cover to protect against the cold moonlight.

### The word UNI-VERSUM

We have been baffled by the beauty of the universe since the beginning of civilization. Universe is contracted of two Latin words **UNI**, meaning One, and **VERSUM**, is verse. In other words one sentence spoken by God, who is **'the Matrix of all Matter'**, was enough to bring the Universe into existence.

### In Conclusion:

Whether the universe is 2 or 3 dimensional does not affect our everyday life. However, **Modern Science** is resolute to put cracks in **the Rock of Truth: the Bible.** Our faith in the Bible erodes when we accept these unproven theories as facts. **"When the Son of man comes, shall he find faith?"** or will it all be gone with **"the wisdom of men** (and **Modern Science**) **which is such foolishness to God"?** (Mat.24:35) (1Cor.3:19)

NEXT - Don't miss Part 2 about: **'Mother Earth'**.
