

Who or What should I Believe and Why?

TRUTH

My dad taught me two things: 'Don't spend money that you don't have; be honest and keep your word.' So, it irks me when people lie, whether they're lying scientists, religious preachers, professors or beggars.

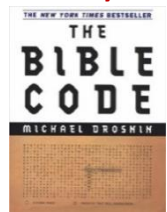

Can you believe it; I never liked Bible-people as I loved life. I was an anti-Bible believer, that was until I started reading it around the age of 21 and I was fascinated. Instead of criticising it, I'd research for hard evidence, to see if there was truth in those "outdated, controversial" texts. I loved the quote:

'I like to prove that God's word is right.'

Jesus told Pilate, 'I was born to bear witness of the truth, he who wants the truth, hears me.' (Jn 18:37)

It blew me away how amazing Jesus was and how scientifically and historically accurate the Bible is.

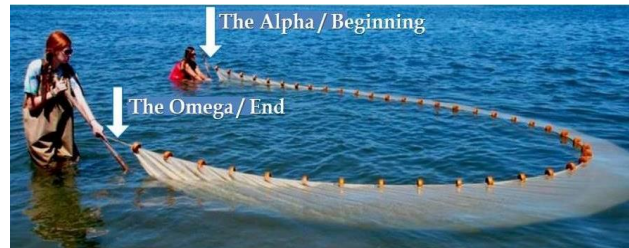

But Why would Anyone Believe the Bible?

Michael Drosnin wrote in his book the BIBLE CODE that Isaac Newton was convinced that there was a hidden code in the Bible that would reveal the future. Harold Gans (Senior code breaker for American intelligence at the Pentagon) was certain he could prove that the code

did not exist... "It sent a chill up my spine" Gans recalled... "At first I was 100% sceptical... **I set out to disprove the code, and ended up proving it.**"

The Yale professor mathematician Piatetski-Shapiro was startled, 'There is **no way in the known laws of mathematics** to explain seeing the future...'

The Lord compares his kingdom to a net cast into the sea. If, I were the Devil, the father of lies (Jn.8:44) then **no-one lies better than me**; so how would I seek to ruin the effectiveness of this net? "Yes, you got it right... I would **cut both handles.**" But that is a big job so I'd **first slash holes in the net** to "free" the fish for me to catch. The good thing is that no one sees me, except some serious devotees, as I work out of sight under water and let pseudoscientists, philosophers and writers do the surface work. The Bible was in Latin and Greek so no problem as none understood, and monks like Tetzl were selling salvation for money. But then some Bible bashing fundamentalists like Luther and Wycliffe translated it for the masses and that is where I had to draw the line and needed to start slashing holes in that net.

1st hole, the Bible says: **the world sits still and its foundations can't be moved.** Copernicus can help me with this, he doesn't think much of God. He will put forth the idea that the world is a globe and spins through space and is not the centre of the universe. Once that idea is out, then I will do the promotion.

2nd hole: the world is in darkness and **we need the age of enlightenment**, we need to get away from this God and Bible idea and I'll inspire Voltaire; then also Thomas Paine to write 'the age of reason'. I make them famous, but they'll pay the price when they face 'death'. Ha, hear their pathetic last words.

I'd love to destroy mankind - Next the handles:

The Alpha handle: It's good to find people knowing the Bible and if I can turn them against it, then we are in business and can attack the handles. Yes, I got him, Charles Darwin he's to become a minister but has his doubts. I'll take him to the Galapagos Islands. I'll show him the development in a little bird's beak and **once the evolution idea is out, I'll spread it further.** People have to know that man is not God's creation, but a despicable herd animal, a freak of nature, a monkey that went wrong.

But then we still have that **irritating Creation idea.** Let me find another religionist. I got him, it's George Lemaitre. He is a priest and professor at the Leuven university. Now he thinks; the universe is expanding. I'll show him, when going back in time the size has to reduce; we increase the date from 6000 to 13½ billion years, so eventually it'll be a miniscule atom. Oh, no one will buy that; it'll have to be a "super atom" that exploded; We will call it "the Big Bang". You need to understand '**People are willing to insult their brain as long as it's nothing to do with God.**'

Now the other handle is the Omega: the return of that alien Jew (I hate his name so I won't mention it) Let's just call it 'the Rapture'. Then I'd need some smart religionists. Yes, John Darby, and Cyrus Scofield to cut the Omega handle by casting doubt on when it'll be. (By the way; I like John Darby. Some even think that he looks like me.)

We change '**After**' to '**Before**' the tribulation, and when there is no rapture before, the Pre-Tribbers will be so confused, they'll throw in the towel and I will pick them up with the 666-RFID... **I'll sponsor Scofield's bible and the bigtime Pre-Trib evangelists** who will do the work for me. Although it says 'many false prophets shall arise, and deceive many.' (Mat.24:11) That's no problem; **people prefer listening to my popular boys than study their Bible.**

Don't worry, see I know the Bible too. I've got it all; I have the dough, the media and do the promotion.

Oh yes, one last thing: **if God has a Bible, I also need one.** I'll get Anton LaVey to do "[The Satanic Bible](#)". Isn't that cool? And I've got the masses to worship [money](#) as 'the golden Calf became their golden Bull.'

Hitler, a cohort of him, wrote in 'Mein Kampf'

"It would never come into the heads of the **broad masses to fabricate colossal untruths**, and they

would not believe that others could have the impudence to distort the truth so infamously...

They will still doubt... For the grossly impudent lie always leaves

traces behind it, even after it has been nailed down, a fact which is known to all expert liars."

Joseph Goebbels (Hitler's propaganda minister)

another cohort; he said, "**If you tell a lie big enough and keep repeating it, people will eventually come to believe it...**"

Isn't that how the media alters Biblical truths?

Einstein said, 'it's what we think we know that keeps us from learning.' Shall we put aside what we think we know and look at things from a simple Dutch, two-feet-on-the-ground, commonsense viewpoint?

Take our earth for example.

We are just quoted that: **the earth sits still** (Zec.1:11) **and its foundations will not be moved.** (Psalms 104:5)

My Question is: As the world allegedly turns east to west, 1000 mph, you can only land a plane east-west or west-east. If your landing strip is north-south or south-north, then you would hit a landing strip that is speeding sideways at a 1000 mph. Commonsense tells me that you will not safely land your plane as it would roll over like a tumble weed in the wind.

(Doesn't add up, does it?)

The Missing Day of NASA

The Bible says; the sun stood still for about a day and Hezekiah's sundial went back 10 degrees.

NASA has, **not for public**, scientific proof of this.

Say, we can drive our car at 1000 mph, the speed of the earth, and we suddenly throw it in reverse. We'd

fly through the front screen with seatbelts and all...

The Van Allen Belt is a dome over the earth with high radiation and temperatures of around 2000°. When asking NASA how the first moon travels went through the high temperature and radiation of this Belt; the files were lost. This is the nine-minute link (access date 12/24).

This interviewer asked the first seven astronauts to clear any confusion about the moon landings to put their hand on the Bible and state they were on the moon. Six refused, one did, but he was infuriated.

(Doesn't add up, does it?)

Nascimento said, 'Rebellion is not what most people think it is. Rebellion is when you turn off your TV and start educating yourself.'

The Indian gov't is negotiating a 4-billion-dollar deal with the Russians about the **Voronezh Radar system**

that can reach vertically 8000 kms and **horizontally 6000 kms.**

The system can monitor more than 500 objects simultaneously. Radars work in straight lines.

What is the use of buying such

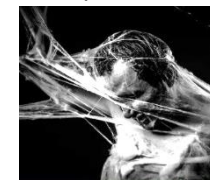

an expensive thing if the world is globe, as radars cannot see around a corner, unless the earth is flat. If the world is a globe, then it could spot only things 20 miles or 33 kms away if they were taller than 266 feet or 81 metres. Unless the radar is 266 feet high, which I doubt, then it can reach 40 miles or 66 kms. Take your pencil and verify it with the Pythagoras formula: $a^2+b^2=c^2$. The hypothetical earth radius being 3963 miles.

(Doesn't add up, does it?)

"Look, I just live my life and honestly, I don't care one bit about all this Bible stuff." - In that case if we don't know what we stand for we'll fall for anything. We'll devour Satan's foul-slob like hungry pigs, as we have zero standard of truth in our life and are totally preoccupied with chasing the money carrot.

When watching the news doesn't it make you sick?

People in fear; women and children slaughtered; the economy crumbling. It's soon that we'll get a **strong leader** to pull us out of this. He'll come and it's none other than the planner himself, Satan incarnate, aka as the Antichrist. He comes to power with an 'intl. political economic peace treaty' for the dawn of a New World. (see clarification) Then according to Daniel there'll be seven years left. The False Prophet and Antichrist will spin webs of such captivating lies that we will not get free from unless we know the 100% truth. **The smell of money perks attracts** so we'll be caught

in their web with the RFID. **They'll go in for the kill.** This will be in the second half of these last seven years, the 3½ years of tribulation. We won't get out of Satan's webnet till he has sucked the last drop of life-blood out of us... It'll all climax in Satan's foulest deed: nuclear war; that's when Jesus rescues us, on time, "immediately after the tribulation." (Mat.24:29) **When he comes shall he find faith on earth?** (Lk.18:8)

If we don't think the Bible is 100% true, then **stop wasting time and money on religion and Pre-Trib**; but study the Book and invest funds where it counts.

Okay, but what about Carbon dating & Dinosaurs?

What about Natural disasters if God is love?

I buried my child, what do you say to that?

For answers click the links – Do you know Jesus?

Please take time off; without TV and study. Prepare now, as life is short, but eternity is a loooong time...

Download 'A Man of Sufficient Stature' **Part 1 & Part 2.** Two short studies about the Last Days before God's Kingdom comes.

At <https://johanpeters.in> you find 90 plus leaflets like these on many subjects; **nine books**; **27 Audio Prophecy Bites** (2-4 minute each) **A study Bible** for PC or Laptop and much more!

ALL DOWNLOADS FREE - NO COOKIES - NO INFO ASKED.

Will I see you up there? I'd love to meet you!
