

The Great Flood

THE GREENHOUSE EFFECT BEFORE THE FLOOD

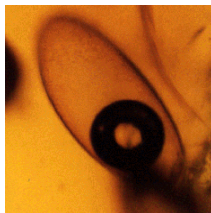

The Lord said: *'I made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament.'* (Gen.1:6,7) and there were *'the fountains of the deep'*. (Gen.8:2) The waters above the firmament were a canopy that gave a **greenhouse** effect on the Earth. It shielded the Earth and those living on it from the cosmic radiation, the damaging UV and Carbon-14 rays. Before the flood the sun and moon were not clearly visible, as their light was filtered by this water/ice layer. The sun and moon are referred to back then as, *'the greater light to rule the day, and the lesser light to rule the night:'* (Gen.1:16) They are only mentioned by name after the Flood.

The weight of the protective translucent water layer **increased the oxygen** level by more than half. This gave an amazing **huge sub-tropical Flora and Fauna**; of the flora we still find proof in Arctic regions and the coalmines worldwide.

After the flood, the oxygen level dropped from 35% to 21%.

'Minute bubbles of ancient air trapped by successive flows of tree resin during the life of the tree are preserved in the amber.' - According to Science Forum: Results are based upon more than 300 analyses by US Geological Survey scientists ...

In those days the increased air pressure meant **more oxygen** gets into the blood stream, which means better health and longer life. **People, plants and**

animals could live up to ten times longer than what is possible today.

DINOSAURS:

The **indeterminate reptiles** could grow into **colossal animals**, as they continued to grow throughout their lifetime. We have now called these creatures dinosaurs.

According to Science Forum: **Oxygen Deprivation Caused Dinosaur Extinction**. Dinosaurs had relatively small lungs for their oversized bodies and did not survive because of lack of oxygen. Seeing the oxygen dropped from 35% to 21% after the flood the dinos could no longer survive. Recent scientific research left **scientists baffled (Pls. listen to this)** as it showed that the bone marrow of the dinosaur bones was soft tissue that had not fossilized. This means that the dinosaurs did not die millions of years ago, but only recently.

CARBON-14, or ¹⁴C DATING:

Carbon dating is used to work out the age of organic material - in effect, any living thing. The technique hinges on carbon-14 (¹⁴C) radioactive dating, which is applicable only to matter, presumed to be in balance with today's atmosphere, and was taking in carbon dioxide from the air for photosynthesis. With the waters above the firmament, the ¹⁴C radio carbon atoms would have been missing or barely present in the biosphere and in living organisms. **The less ¹⁴C is found in a fossil, the older it is estimated to be.** Hence, the fossils from **before the flood** will date much older than they really are as they have practically **no traces of ¹⁴C**.

HOW PSEUDO-SCIENCE DENIES THE FLOOD

"The Pleistocene Epoch is the time period that began about 1.8 million years ago until 11,700 years ago. The Pleistocene Epoch was the first epoch in the Quaternary Period and the sixth in the Cenozoic Era. It was followed by the **current stage, called the**

Holocene Epoch. The ice age that began **2.6 million years ago** at the start of the Pleistocene epoch, There have been at least five documented major ice ages during the 4.6 billion years since the Earth was formed." (*Now it is guesstimated 13.6 billion years*) <http://www.livescience.com/40311-pleistocene-epoch.html> **Science Daily tells:** "Science has struggled to explain fully why an ice age occurs every 100,000 years." **Science News states:** "The ice-age ice masses accumulate over tens of thousands of years and recede within the space of a few thousand years." I put this in to show that **Pseudo-Science** is clueless. They **'love and make a lie'** (Rev.22:13) **as none of their years and theories match;** while the definition says: **"Science is to discover FACTS... that can be tested and verified by further investigation."**

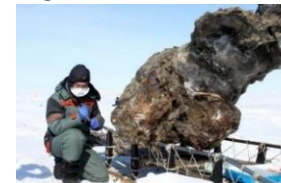

Academic Press Dictionary of Science & Technology.

WELL THEN, WHEN DID IT HAPPEN?

'In the six hundredth year of Noah's life, in the second month, the seventeenth day of the month, the same day were all the fountains of the great deep broken up, and floodgates of heaven were opened.' (Genesis 7:11). For the sake of brevity, I was going to leave the day and month out, however this shows how exact the Lord is. He does not estimate between 1,000,000 to 1,800,000 years ago. No, the Lord gives the exact year, month and day. Neither does the Lord change the age of the Earth.

MAMMOTHS

Many **mammoths** were found, with sub-tropical vegetation in their mouths - FROZEN INSTANTLY.

Excerpts of an article of **"The Siberian Times"** (13 March 2014 article by Anna Liesowska) 'Radik Khayrullin said, 'the blood we have obtained is 'agonised' - which means that the mammoth died an unnatural death, it must have been in agony for 16, 18 hours. This is also confirmed by the position of the body, with its back leg stretched in an unnatural way.

Noah survived the Flood; the Ark rested on [Mount Ararat where it's preserved](#). (Gen.8:4) Ocean liners are still built according to the dimensions of the Ark. After the Flood the Lord said, *'While the earth remains, seedtime and harvest, and cold and heat, and summer and winter... shall not cease.'* (Gen.8:22) When the protective waters came down, the climate zones came immediately into existence: the ice-cold polar zones and the warmer climates. In the cold regions, the waters came down as ice crystals, hail and snow **freezing everything in its path**.

HOW THE MAMMOTHS FROZE

Hence for the huge mammoths the climate changed from the subtropical to an **instant total deep-freezer**. Just as we read how the mammoth had an unnatural death, in agony... its back leg stretched in an unnatural way.' Obviously, the mammoth could not support the weight of the ice and its back leg slipped away and it died an agonizing death. In the tropical and subtropical climates, the water fell as rain. That is why it is recorded as rain. *'And the rain was upon the earth forty days,'* (Gen.7:12)

MASS FOSSIL GRAVES? www.huffingtonpost.com

Sept. 8, 2015 – 'A huge array of ice age fossils, including the bones of turtles, horses, bison and mammoths were uncovered.

The fossils found in Carlsbad, California.' Again, I have a question: Did they decide, 'Hey guys, let's cuddle up here and die together!'? Or is it more likely that **the violent flood waters swept them off their feet** and they ended up in a big heap? It is proof after proof that [the Bible truth](#) is out there! [Who or What should I believe and Why?](#)

MOUNT EVEREST AND 'THE GREAT DIVIDE'

In 1953 Sir Edmund Hillary and Tenzing Norgay climbed Mount Everest of 29,030 feet, or 8848 meters high. When they got up to the altitude of 26,000 feet, or 7924 meters, they began to find sea shells. That is 3030 feet, or 924 meters, from the summit. How's that possible; did mussels climb mountains, or were the Himalayas much lower during the Flood, before the **great divide of the tectonic plates' movement?** *'Unto Eber were born two sons: one Peleg (meaning division); for in his days (his birth 101 years after the Flood) was the earth divided;'* (Gen.10:25) The different areas **already had some population** on them before the Great Divide, so diverse peoples can look similar.

Seashells are found on many mountains, as the Flood waves deposited seashells and mud on the mountain bases. Mount Everest was during the flood only 924 metres or 3,030 feet high, as 29,030 feet minus 26,000 is 3,030 feet. Therefore from 26,000 feet upwards is where the shells are found. Then during the great continental divide and the collision of the Indo-Australian tectonic plate with the Eurasian plate, the Himalayas were pushed to a much higher altitude and Mount Everest rose by 26,000 feet. Hence, no seashells below 26,000 feet.

The shifting of tectonic plates and the moving of the continents was **a tremendous upheaval**, with whole cities and regions like Atlantis; pyramids, temples, and structures sliding underwater. We find them everywhere; off the coasts of Greece, Portugal, Japan, Italy, Cuba, South America, etc., etc.

Temple off India's coast

This enormous pyramid is near Yonaguni, Japan. The size of the blocks shows that it was pre-diluvian, or from before the flood, as in those days there were **'giants in the land'** who were able to assist in moving these enormous stone blocks into place.

Professor Masaki Kimura (geologist at Ryukyu University in Okinawa) "This could only have been done by a people with a high degree of technology... to have created such a huge structure."

The people before the flood and right after the flood lived for centuries and accumulated in their lifetime vast knowledge, and were able to develop technologies and buildings that still baffle us, like the Great Pyramid of Giza, built with a precision that our current technology cannot yet replicate.

EXTINCT BUT STILL ALIVE.

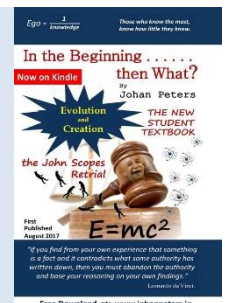

'This **frilled shark** discovered off the coast of Portugal in 2017 has remained unchanged for 80 million years, since the time of the dinosaurs. Scientists are dating it back to the Cretaceous Period, a time when the Tyrannosaurus Rex roamed the planet.'

'The Coelacanth, was once only known from fossils and was thought to have gone extinct during great extinction when the dinosaurs vanished 65 million years ago. It got rediscovered 1938.'

Maybe [Creation](#) is more commonsensical?

These excerpts are taken from **'In the Beginning...Then What?'** A fiery court-case in which Evolution and Creation are presented. In there you will also find the references, and an amazing number of **other finds and answers to questions**; i.e. what about Natural Selection and Mutations, etc., etc.

At <https://johanpeters.in> you find 100 plus pamphlets on subjects from Creation to Kingdom come & **10 books**, etc. ALL DOWNLOADS ARE FREE-NO COOKIES-NO INFO ASKED. Contact: info@johanpeters.in
